SUBJECT and TITLE INDEX

POLYMER ENGINEERING AND SCIENCE
VOLUME 9
1969

A

1. ABS

The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*
Interpretation of the Tensile Creep Response of an ABS Polymer, R. S. Moore and C. Gieniewski, *May, p. 190*
Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. I. Observation of Fine Structures Under the Electron Microscope, M. Matsuo, C. Nozaki, Y. Jyo, *May, p. 197*
Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. II. Observation of Crazing Behaviors Under the Electron Microscope, M. Matsuo, *May, p. 206*
Flexural Fatigue of Glass-Reinforced Thermoplastics, L. C. Cessna, J. A. Levens and J. B. Thomson, *September, p. 339*

2. Acetal

A Model for Polymer Fatigue, D. A. Opp, D. W. Skinner and R. J. Wiktorek, *March, p. 121*

3. Acrylate

Some Observations on Internal Plasticization of Polyvinyl Chloride, R. Liepins, *March, p. 86*
The Mechanical and Other Physical Properties of Polyelectrolyte Salts in the Solid State, L. E. Nielsen, *September, p. 356*

4. Acrylic Acid

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*
The Mechanical and Other Physical Properties of Polyelectrolyte Salts in the Solid State, L. E. Nielsen, *September, p. 356*

5. Acrylonitrile Copolymer

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*

6. Additives, Low Molecular Weight

Rheological Behavior of Poly(Vinyl Chloride) Mixtures. II. Elastic Behavior, C. L. Sieglaff and C. G. Vinson, *January, p. 73*
Rheological Behavior of Poly(Vinyl Chloride) Mixtures. I. Viscous Behavior, C. L. Sieglaff, *March, p. 81*

7. Adhesion

A Macroscopic Analysis of Composites Containing Layered Spherical Inclusions, V. A. Matonis and N. C. Small, *March, p. 90*

8. Aging

Resins and Reinforced Plastic Laminates for Continuous Use at 650°F–II, J. H. Freeman, L. W. Frost, G. M. Bower, E. J. Traynor, H. A. Burgman, C. R. Ruffing, *January, p. 56*
Some Physical Organic Chemistry of Aging Processes, F. R. Mayo and K. C. Irwin, *July, p. 282*

9. Alkane

The Effect of Penetrant Activity and Temperature on the Anomalous Diffusion of Hydrocarbons and Solvent Crazing in Polystyrene, Part I: Biaxially Oriented Polystyrene, H. B. Hopfenberg, R. H. Holley, and V. Stannett, *July, p. 242*

10. Antiplasticizer

The Effect of Antiplasticization on Secondary Loss Transitions and Permeability of Polymers, L. M. Robeson, *July p. 277*

B

11. Barium Diacrylate

Photopolymerization Studies: I. Polymers from New Photoredox Catalyst System, J. B. Rust, L. J. Miller and J. D. Margerum, *January, p. 40*

C

12. Calorimeter

Thermomechanical Studies of Polymer Deformation, Part I: A New Deformation Calorimeter, I. J. Duvdevani, J. A. Biesenberger, and C. G. Gogos, *July, p. 250*

13. Carbon Black

Natural and Artificial Weathering of Polyethylene Plastics, J. B. Howard and H. M. Gilroy, *July, p. 286*

14. Catalyst

Photopolymerization Studies: I. Polymers from New Photoredox Catalyst System, J. B. Rust, L. J. Miller and J. D. Margerum, *January, p. 40*
Glass-Catalyzed Hydrolysis of Silane Coupling Agents, L. R. Daley and I. Rodriguez, *November, p. 428*

15. Chain Model

Folded Chain Model of Highly Drawn Polyethylene, A. Peterlin, *May, p. 172*

16. Comonomer

Some Observations on Internal Plasticization of Polyvinyl Chloride, R. Liepens, *March, p. 86*

17. Composite

A Macroscopic Analysis of Composites Containing Layered Spherical Inclusions, V. A. Matonis and N. C. Small, *March, p. 90*
The Interfacial Stresses in Particulate Composite Systems, V. A. Matonis, *March, p. 100*
Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*
The Mechanical and Other Physical Properties of Polyelectrolyte Salts in the Solid State, L. E. Nielsen, *September, p. 356*
The Effect of Aspect Ratio on the Fatigue Life of Short Boron Fiber Reinforced Composites, R. E. Lavengood and L. B. Gulbransen, *September, p. 365*

18. Coupling Agent

Glass-Catalyzed Hydrolysis of Silane Coupling Agents, L. R. Daley and F. Rodriguez, *November, p. 428*

19. Crazing

Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. II. Observation of Crazing Behaviors Under the Electron Microscope, M. Matsuo, *May, p. 206*
The Effect of Penetrant Activity and Temperature on the Anomalous Diffusion of Hydrocarbons and Solvent Crazing in Polystyrene, Part I: Biaxially Oriented Polystyrene, H. B. Hopfenberg, R. H. Holley, and V. Stannett, *July, p. 242*

20. Creep

The Effect of Biaxial Stress on the Creep Properties of Polymethyl Methacrylate, M. Zaslawsky, *March, p. 105*
Interpretation of the Tensile Creep Response of an ABS Polymer, R. S. Moore and C. Gieniewski, *May, p. 190*
Mechanical Behavior of Polytetrafluoroethylene Around the Room-Temperature First-Order Transition, G. P. Koo and R. D. Andrews, *July, p. 268*
On the Characterization of Nonlinear Viscoelastic Materials, R. A. Schapery, *July, p. 295*
Combined Tension-Torsion Creep Experiments on Polycarbonate in the Non-Linear Range, J. S. Y. Lai and W. N. Findley, *September, p. 378*
Uniaxial Compressive Creep of Polytetrafluoroethylene, D. A. Thomas, *November, p. 415*

21. Crotonate

Some Observations on Internal Plasticization of Polyvinyl Chloride, R. Liepins, *March, p. 86*

22. Crystallinity

Thermodynamic and Physical Properties of Crystals Formed from Dilute Solutions, L. Mandelkern, *July, p. 255*

Mechanical Behavior of Polytetrafluoroethylene Around the Room-Temperature First-Order Transition, G. P. Koo and R. D. Andrews, *July, p. 268*

Rheo-optics on Two Continents—An Example of International Cooperation in Science, R. S. Stein, *September, p. 320*

23. Crystallization

Effect of Melt History on Polymer Crystallization, J. R. Collier and L. M. Neal, *May, p. 182*

Effects of Shear Stress on Crystallization of Linear Polyethylene and Polybutene—1, T. W. Haas and B. Maxwell, *July, p. 225*

24. Crystal

Thermodynamic and Physical Properties of Crystals Formed from Dilute Solutions, L. Mandelkern, *July, p. 255*

Rheo-optics on Two Continents—An Example of International Cooperation in Science, R. S. Stein, *September, p. 320*

25. Curing

Resins and Reinforced Plastic Laminates for Continuous Use at 650°F—II, J. H. Freeman, L. W. Frost, G. M. Bower, E. J. Traynor, H. A. Burgman, C. R. Ruffing, *January, p. 56*

D

26. Deformation

Effects of Shear Stress on Crystallization of Linear Polyethylene and Polybutene—1, T. W. Haas and B. Maxwell, *July, p. 225*

Thermomechanical Studies of Polymer Deformation, Part I: A New Deformation Calorimeter, I. J. Duvdevani, J. A. Biesenberger, and C. G. Gogos, *July, p. 250*

Rheo-optics on Two Continents—An Example of International Cooperation in Science, R. S. Stein, *September, p. 320*

Uniaxial Compressive Creep of Polytetrafluoroethylene, D. A. Thomas, *November, p. 415*

Microscopic Observations of Fracture in Spherulitic Films of Polybutene-1, T. W. Haas and P. H. MacRae, *November, p. 423*

27. Density

The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*

Thermodynamic and Physical Properties of Crystals Formed from Dilute Solutions, L. Mandelkern, *July, p. 255*

The Effect of Antiplasticization on Secondary Loss Transitions and Permeability of Polymers, L. M. Robeson, *July, p. 277*

Meaning and Measurement of Crystallinity in Polymers: A Review, S. Kavesh and J. M. Schultz, *November, p. 452*

28. Design

The Effect of Design and Operating Conditions on Melting in Plasticating Extruders, Z. Tadmor and I. Klein, *January, p. 1*

A Macroscopic Analysis of Composites Containing Layered Spherical Inclusions, V. A. Matonis and N. C. Small, *March, p. 90*

The Interfacial Stresses in Particulate Composite Systems, V. A. Matonis, *March, p. 100*

29. Dichromate Sensitization

Reciprocity Failure in Films of Flash Exposed Dichromate Sensitized Polyvinyl Alcohol, A. G. Leiga and R. A. Walder, *January, p. 35*

30. Differential Thermometry

Thermomechanical Studies of Polymer Deformation, Part I: A New Deformation Calorimeter, I. J. Duvdevani, J. A. Biesenberger, and C. G. Gogos, *July, p. 250*

31. Diffusion

The Effect of Penetrant Activity and Temperature on the Anomalous Diffusion of Hydrocarbons and Solvent Crazing in Polystyrene, Part I: Biaxially Oriented Polystyrene, H. B. Hopfenberg, R. H. Holley, and V. Stannett, *July, p. 242*

32. Dynamic Properties

A Model for Polymer Fatigue, D. A. Opp, D. W. Skinner and R. J. Wiktorek, *March, p. 121*

E

33. Elasticity

Rheological Behavior of Poly(Vinyl Chloride) Mixtures. II. Elastic Behavior, C. L. Sieglaff and C. G. Vinson, *January, p. 73*

The Influence of Molecular Weight Distribution on Melt Viscosity, Melt Elasticity, Processing Behavior and Properties of Polystyrene, D. P. Thomas and R. S. Hagan, *May, p. 164*

34. Elastic Modulus

Folded Chain Model of Highly Drawn Polyethylene, A. Peterlin, *May, p. 172*

35. Electrical Properties

Resins and Reinforced Plastic Laminates for Continuous Use at 650°F—II, J. H. Freeman, L. W. Frost, G. M. Bower, E. J. Traynor, H. A. Burgman, C. R. Ruffing, *January, p. 56*

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*

36. Electrolyte Salts

The Mechanical and Other Physical Properties of Polyelectrolyte Salts in the Solid State, L. E. Nielsen, *September, p. 356*

37. Epoxy

The Effect of Temperature on the Delayed Yield and Failure of "Plasticized" Epoxy Resin, O. Ishai, *March, p. 131*

The Effect of Aspect Ratio on the Fatigue Life of Short Boron Fiber Reinforced Composites, R. E. Lavengood, and L. B. Gulbransen, *September, p. 365*

38. Ethyl Cellulose

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*

39. Extrudate

The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*

40. Extruder

The Effect of Design and Operating Conditions on Melting in Plasticating Extruders, Z. Tadmor and I. Klein, *January, p. 1*

The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*

Shear Modification of Polythene, D. E. Hanson, *November, p. 405*

41. Extrusion

The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*

The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*

Some Physical Properties of Multilayered Films, W. J. Schrenk and T. Alfrey, Jr., *November, p. 393*

Shear Modification of Polythene, D. E. Hanson, *November, p. 000*

F

42. Failure Characteristics

The Effect of Temperature on the Delayed Yield and Failure of "Plasticized" Epoxy Resin, O. Ishai, *March, p. 131*

43. Fatigue

A Model for Polymer Fatigue, D. A. Opp, D. W. Skinner and R. J. Wiktorek, *March, p. 121*

Flexural Fatigue of Glass-Reinforced Thermoplastics, L. C. Cessna, J. A. Levens and J. B. Thomson, *September, p. 339*

The Effect of Aspect Ratio on the Fatigue Life of Short Boron Fiber Reinforced Composites, R. E. Lavengood and L. B. Gulbransen, *September, p. 365*

Fatigue Behavior of Glass Fiber Fortified Thermoplastics, J. W. Dally and D. H. Carrillo, *November, p. 434*

44. Fiber

Folded Chain Model of Highly Drawn Polyethylene, A. Peterlin, *May, p. 172*
The Effect of Aspect Ratio on the Fatigue Life of Short Boron Fiber Reinforced Composites, R. E. Lavengood and L. B. Gulbransen, *September, p. 365*
Derivative Stress-Strain Curves of Polyacrylonitrile Fibers, G. Egbers, *September, p. 370*

45. Film

Reciprocity Failure in Films of Flash Exposed Dichromate Sensitized Polyvinyl Alcohol, A. G. Leiga and R. A. Walder, *January, p. 35*
Some Physical Properties of Multilayered Films, W. J. Schrenk and T. Alfrey, Jr., *November, p. 393*
Physical Optics of Iridescent Multilayered Plastic Films, T. Alfrey, Jr., E. F. Gurnee, W. J. Schrenk, *November, p. 400*
Microscopic Observations of Fracture in Spherulitic Films of Polybutene-1, T. W. Haas and P. H. MacRae, *November, p. 423*

46. Flexural Data

Resins and Reinforced Plastic Laminates for Continuous Use at 650°F–II, J. H. Freeman, L. W. Frost, G. M. Bower, E. J. Traynor, H. A. Burgman, C. R. Ruffing, *January, p. 56*
Flexural Fatigue of Glass-Reinforced Thermoplastics, L. C. Cessna, J. A. Levens and J. B. Thomson, *September, p. 339*
The Mechanical and Other Physical Properties of Polyelectrolyte Salts in the Solid State, L. E. Nielsen, *September, p. 356*
The Effect of Aspect Ratio on the Fatigue Life of Short Boron Fiber Reinforced Composites, R. E. Lavengood and L. B. Gulbransen, *September, p. 365*
An Izod Specimen for the Simulation of Conditions of Plastic Use, C. G. Vinson, *November, p. 388*

47. Flow

Flow Behavior of Partially Crosslinked Low-Density Polyethylene, M. Narkis and J. Miltz, *May, p. 153*
Flow Properties of Plasticized PVC: Reduction to Composition and Interaction Variables, H. P. Schreiber, *July, p. 311*
Flow Properties of Polyethylene Melts, R. A. Mendelson, *September, p. 350*
Brabender Viscometry, Part I: Conversion of Brabender Curves to Instron Flow Curves, G. C. N. Lee and J. R. Purdon, *September, p. 360*

48. Flow Mechanism

Particle Size and Molecular Weight Effects on the Melt Flow of Emulsion PVC, A. R. Berens and V. L. Folt, *January, p. 27*

49. Fracture

Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. I. Observation of Fine Structures Under the Electron Microscope, M. Matsuo, C. Nozaki, Y. Jyo, *May, p. 197*
Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. II. Observation of Crazing Behaviors Under the Electron Microscope, M. Matsuo, *May, p. 206*
Microscopic Observations of Fracture in Spherulitic Films of Polybutene-1, T. W. Haas and P. H. MacRae, *November, p. 423*

50. Free Radical

Photopolymerization Studies: I. Polymers from New Photoredox Catalyst System, J. B. Rust, L. J. Miller and J. D. Margerum, *January, p. 40*
Some Physical Organic Chemistry of Aging Processes, F. R. Mayo and K. C. Irwin, *July, p. 282*

G

51. Glass Fiber

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*
Flexural Fatigue of Glass-Reinforced Thermoplastics, L. C. Cessna, J. A. Levens and J. B. Thomson, *September, p. 339*
Glass-Catalyzed Hydrolysis of Silane Coupling Agents, L. R. Daley and F. Rodriguez, *November, p. 428*
Fatigue Behavior of Glass Fiber Fortified Thermoplastics, J. W. Dally and D. H. Carrillo, *November, p. 434*

H

52. Heat Effect

Experimental Measurement of Temperature Profiles of Molten Flowing Polymers in a Heat Exchanger, T. H. Forsyth and N. F. Murphy, *January, p. 22*

53. Heat Exchanger

Experimental Measurement of Temperature Profiles of Molten Flowing Polymers in a Heat Exchanger, T. H. Forsyth and N. F. Murphy, *January, p. 22*

54. High Temperature Resins

Resins and Reinforced Plastic Laminates for Continuous Use at 650°F–II, J. H. Freeman, L. W. Frost, G. M. Bower, E. J. Traynor, H. A. Burgman, C. R. Ruffing, *January, p. 56*

55. Hydrolysis

Glass-Catalyzed Hydrolysis of Silane Coupling Agents, L. R. Daley and F. Rodriguez, *November, p. 428*

56. Hypothetical Composite

A Macroscopic Analysis of Composites Containing Layered Spherical Inclusions, V. A. Matonis and N. C. Small, *March, p. 90*

I

57. Iridescence

Physical Optics of Iridescent Multilayered Plastic Films, T. Alfrey, Jr., E. F. Gurnee, W. J. Schrenk, *November, p. 393*

58. Izod Test

An Izod Specimen for the Simulation of Conditions of Plastic Use, C. G. Vinson, *November, p. 388*

L

59. Laminates, Reinforced Plastic

Resins and Reinforced Plastic Laminates for Continuous Use at 650°F–II, J. H. Freeman, L. W. Frost, G. M. Bower, E. J. Traynor, H. A. Burgman, C. R. Ruffing, *January, p. 56*

60. Light Scattering

Photopolymerization Studies: I. Polymers from New Photoredox Catalyst System, J. B. Rust, L. J. Miller and J. D. Margerum, *January, p. 40*

61. Loss Transition

The Effect of Antiplasticization on Secondary Loss Transitions and Permeability of Polymers, L. M. Robeson, *July, p. 277*

62. Lubricant

Rheological Behavior of Poly(Vinyl Chloride) Mixtures. II. Elastic Behavior, C. L. Sieglaff and C. G. Vinson, *January, p. 73*
Rheological Behavior of Poly(Vinyl Chloride) Mixtures. I. Viscous Behavior, C. L. Sieglaff, *March, p. 81*

M

63. Maleic Anhydride Copolymer

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*

64. Mathematical Model

The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*

65. Mechanical Behavior

The Effect of Temperature on the Delayed Yield and Failure of "Plasticized" Epoxy Resin, O. Ishai, *March, p. 131*
Mechanical Behavior of Polytetrafluoroethylene Around the Room-Temperature First-Order Transition, G. P. Koo and R. D. Andrews, *July, p. 268*
Derivative Stress-Strain Curves of Polyacrylonitrile Fibers, G. Egbers, *September, p. 370*

66. Mechanical Properties

The Extrusion of Polymers Below Their Melting Temperatures by the Applica-

tion of High Pressures, A. Buckley and H. A. Long, *March, p. 115*
Dynamic Mechanical Properties of Polymer Melts: The Dependence of Viscoelastic Properties on Molecular Weight Distribution, R. P. Chartoff and B. Maxwell, *May, p. 159*
The Influence of Molecular Weight Distribution on Melt Viscosity, Melt Elasticity, Processing Behavior and Properties of Polystyrene, D. P. Thomas and R. S. Hagan, *May, p. 164*
Folded Chain Model of Highly Drawn Polyethylene, A. Peterlin, *May, p. 172*
Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*
The Mechanical and Other Physical Properties of Polyelectrolyte Salts in the Solid State, L. E. Nielsen, *September, p. 356*
Mechanical and Optical Properties of Block Polymers. I. Polyester Urethanes, G. M. Estes, R. W. Seymour, D. S. Huh, and S. L. Cooper, *November, p. 383*
Shear Modification of Polythene, D. E. Hanson, *November, p. 405*

67. Melt

Dynamic Mechanical Properties of Polymer Melts: The Dependence of Viscoelastic Properties on Molecular Weight Distribution, R. P. Chartoff and B. Maxwell, *May, p. 159*
Effects of Shear Stress on Crystallization of Linear Polyethylene and Polybutene-1, T. W. Haas and B. Maxwell, *July, p. 225*
Flow Properties of Polyethylene Melts, R. A. Mendelson, *September, p. 350*

68. Melt Failure

A Model for Polymer Fatigue, D. A. Opp, D. W. Skinner and R. J. Wiktorek, *March, p. 121*

69. Melt Flow

Particle Size and Molecular Weight Effects on the Melt Flow of Emulsion PVC, A. R. Berens and V. L. Folt, *January, p. 27*

70. Melting

The Effect of Design and Operating Conditions on Melting in Plasticating Extruders, Z. Tadmor and I. Klein, *January, p. 1*
The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*
The Melting of a Polymer on a Hot Surface, E. Stammers and W. J. Beek, *January, p. 49*
Shear Modification of Polythene, D. E. Hanson, *November, p. 405*

71. Melting Grid

The Melting of a Polymer on a Hot Surface, E. Stammers and W. J. Beek, *January, p. 49*

72. Melt Treatment

Effect of Melt History on Polymer Crystallization, J. R. Collier and L. M. Neal, *May, p. 182*

73. Melt Viscosity

The Influence of Molecular Weight Distribution on Melt Viscosity, Melt Elasticity, Processing Behavior and Properties of Polystyrene, D. P. Thomas and R. S. Hagan, *May, p. 164*

74. Methacrylate

Some Observations on Internal Plasticization of Polyvinyl Chloride, R. Liepins, *March, p. 86*

75. Methacrylic Acid Copolymer

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*

76. Molecular Weight

Particle Size and Molecular Weight Effects on the Melt Flow Emulsion PVC, A. R. Berens and V. L. Folt, *January, p. 27*
Natural and Artificial Weathering of Polyethylene Plastics, J. B. Howard and H. M. Gilroy, *July, p. 286*

77. Molecular Weight Distribution

Dynamic Mechanical Properties of Polymer Melts: The Dependence of Viscoelastic Properties on Molecular Weight Distribution, R. P. Chartoff and B. Maxwell, *May, p. 159*
The Influence of Molecular Weight Distribution on Melt Viscosity, Melt Elasticity, Processing Behavior and Properties of Polystyrene, D. P. Thomas and R. S. Hagan, *May, p. 164*

78. Molten Polymers

Experimental Measurement of Temperature Profiles of Molten Flowing Polymers in a Heat Exchanger, T. H. Forsyth and N. F. Murphy, *January, p. 22*
Dynamic Mechanical Properties of Polymer Melts: The Dependence of Viscoelastic Properties on Molecular Weight Distribution, R. P. Chartoff and B. Maxwell, *May, p. 159*

79. Morphology

Folded Chain Model of Highly Drawn Polyethylene, A. Peterlin, *May, p. 172*
Effects of Shear Stress on Crystallization of Linear Polyethylene and Polybutene–1, T. W. Haas and B. Maxwell, *July, p. 225*

N

80. Nitrocellulose Film

On the Characterization of Nonlinear Viscoelastic Materials, R. A. Schapery, *July, p. 295*

81. Nylon

The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*
The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*
A Model for Polymer Fatigue, D. A. Opp, D. W. Skinner and R. J. Wiktorek, *March, p. 121*
Fatigue Behavior of Glass Fiber Fortified Thermoplastics, J. W. Dally and D. H. Carrillo, *November, p. 434*

O

82. Optical Measurements

Photopolymerization Studies: I. Polymers from New Photoredox Catalyst System, J. B. Rust, L. J. Miller and J. D. Margerum, *January, p. 40*
Mechanical and Optical Properties of Block Polymers. I. Polyester Urethanes, G. M. Estes, R. W. Seymour, D. S. Huh, and S. L. Cooper, *November, p. 383*
Some Physical Properties of Multilayered Films, W. J. Schrenk, and T. Alfrey, Jr., *November, p. 393*
Physical Optics of Iridescent Multilayered Plastic Films, T. Alfrey, Jr., E. F. Gurnee, W. J. Schrenk, *November, p. 400*

83. Oxidation

Photopolymerization Studies: I. Polymers from New Photoredox Catalyst System, J. B. Rust, L. J. Miller and J. D. Margerum, *January, p. 40*
Thermodynamic and Physical Properties of Crystals Formed from Dilute Solutions, L. Mandelkern, *July, p. 255*
Some Physical Organic Chemistry of Aging Processes, F. R. Mayo and K. C. Irwin, *July, p. 282*

P

84. Particle Size

Particle Size and Molecular Weight Effects on the Melt Flow of Emulsion PVC, A. R. Berens and V. L. Folt, *January, p. 27*

85. Penetrant Activity

The Effect of Penetrant Activity and Temperature on the Anomalous Diffusion of Hydrocarbons and Solvent Crazing in Polystyrene, Part I: Biaxially Oriented Polystyrene, H. B. Hopfenberg, R. H. Holley, and V. Stannett, *July, p. 242*

86. Permeability

The Effect of Antiplasticization on Secondary Loss Transitions Permeability of Polymers, L. M. Robeson, *July p. 277*
Some Physical Properties of Multilayered Films, W. J. Schrenk and T. Alfrey, Jr., *November, p. 393*

87. Phenolic Resin

On the Characterization of Nonlinear Viscoelastic Materials, R. A. Schapery, *July p. 295*

88. Photocatalyst

Photopolymerization Studies: I. Polymers from New Photoredox Catalyst System, J. B. Rust, L. J. Miller and J. D. Margerum, *January, p. 40*

89. Photooxidant Dyes

Photopolymerization Studies: I. Polymers From New Photoredox Catalyst System, J. B. Rust, L. J. Miller and J. D. Margerum, *January, p. 40*

90. Photopolymerization

Photopolymerization Studies: I. Polymers From New Photoredox Catalyst System, J. B. Rust, L. J. Miller and J. D. Margerum, *January, p. 40*

91. Physical Properties

Particle Size and Molecular Weight Effects on the Melt Flow of Emulsion PVC, A. R. Berens and V. L. Folt, *January, p. 27*
Resins and Reinforced Plastic Laminates for Continuous Use at 650°F—II, J. H. Freeman, L. W. Frost, G. M. Bower, E. J. Traynor, H. A. Burgman, C. R. Ruffing, *January, p. 56*
Some Observations on Internal Plasticization of Polyvinyl Chloride, R. Liepins, *March, p. 86*
Dynamic Mechanical Properties of Polymer Melts: The Dependence of Viscoelastic Properties on Molecular Weight Distribution, R. P. Chartoff and B. Maxwell, *May, p. 159*
Thermodynamic and Physical Properties of Crystals Formed from Dilute Solutions, L. Mandelkern, *July, p. 255*
Natural and Artificial Weathering of Polyethylene Plastics, J. B. Howard and H. M. Gilroy, *July, 286*
The Mechanical and Other Physical Properties of Polyelectrolyte Salts in the Solid State, L. E. Nielsen, *September, p. 356*
The Effect of Aspect Ratio on the Fatigue Life of Short Boron Fiber Reinforced Composites, R. E. Lavengood and L. B. Gulbransen, *September, p. 365*
Mechanical and Optical Properties of Block Polymers. I. Polyester Urethanes, G. M. Estes, R. W. Seymour, D. S. Huh, S. L. Cooper, *November, p. 383*
Some Physical Properties of Multilayered Films, W. J. Schrenk and T. Alfrey, Jr., *November, p. 393*
Meaning and Measurement of Crystallinity in Polymers: A Review, S. Kavesh and J. M. Schultz, *November, p. 452*

92. Plasticization

Rheological Behavior of Poly(Vinyl Chloride) Mixtures. II. Elastic Behavior, C. L. Sieglaff and C. G. Vinson, *January, p. 73*
Rheological Behavior of Poly(Vinyl Chloride) Mixtures. I. Viscous Behavior, C. L. Sieglaff, *March, p. 81*
Some Observations on Internal Plasticization of Polyvinyl Chloride, R. Liepins, *March, p. 86*
Flow Properties of Plasticized PVC: Reduction to Composition and Interaction Variables, H. P. Schreiber, *July, p. 311*

93. Polyacrylonitrile

Derivative Stress-Strain Curves of Polyacrylonitrile Fibers, G. Egbers, *September, p. 370*

94. Polybutadiene Copolymer

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*

95. Polybutene-1

Effects of Shear Stress on Crystallization of Linear Polyethylene and Polybutene—1, T. W. Haas and B. Maxwell, *July, p. 225*
Thermomechanical Studies of Polymer Deformation Part I: A New Deformation Calorimeter, I. J. Duvdevani, J. A. Biesenberger, and C. G. Gogos, *July, p. 250*
Microscopic Observations of Fracture in Spherulitic Films of Polybutene—1, T. W. Haas and P. H. MacRae, *November, p. 423*

96. Polycarbonate

A Model for Polymer Fatigue, D. A. Opp, D. W. Skinner and R. J. Wiktorek, *March, p. 121*
Combined Tension-Torsion Creep Experiments on Polycarbonate in the Non-Linear Range, J. S. Y. Lai and W. N. Findley, *September, p. 378*

97. Polyether, Chlorinated

Effect of Melt History on Polymer Crystallization, J. R. Collier and L. M. Neal, *May, p. 182*

98. Polyethylene

The Effect of Design and Operating Conditions on Melting in Plasticating Extruders, Z. Tadmor and I. Klein, *January, p. 1*
The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*
Experimental Measurement of Temperature Profiles of Molten Flowing Polymers in a Heat Exchanger, T. H. Forsyth and N. F. Murphy, *January, p. 22*
The Melting of a Polymer on a Hot Surface, E. Stammers and W. J. Beek, *January, p. 49*
The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*
Flow Behavior of Partially Crosslinked Low-Density Polyethylene, M. Narkis and J. Miltz, *May, p. 153*
Folded Chain Model of Highly Drawn Polyethylene, A. Peterlin, *May p. 172*
Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*
Effects of Shear Stress on Crystallization of Linear Polyethylene and Polybutene—1, T. W. Haas and B. Maxwell, *July, p. 225*
Thermodynamic and Physical Properties of Crystals Formed from Dilute Solutions, L. Mandelkern, *July, p. 255*
Natural and Artificial Weathering of Polyethylene Plastics, J. B. Howard and H. M. Gilroy, *July, p. 286*
Rheo-optics on Two Continents—An Example of International Cooperation in Science, R. S. Stein, *September, p. 320*
Flow Properties of Polyethylene Melts, R. A. Mendelson, *September, p. 350*
Shear Modification of Polythene, D. E. Hanson, *November, p. 405*
Fatigue Behavior of Glass Fibers Fortified Thermoplastics, J. W. Dally and D. H. Carrillo, *November, p. 434*
Meaning and Measurement of Crystallinity in Polymers: A Review, S. Kavesh and J. M. Schultz, *November, p. 452*

99. Poly(ethylene terephthalate)

Effect of Melt History on Polymer Crystallization, J. R. Collier and L. M. Neal, *May, p. 182*

100. Polyimide

Resins and Reinforced Plastic Laminates for Continuous Use at 650°F—II, J. H. Freeman, L. W. Frost, G. M. Bower, E. J. Traynor, H. A. Burgman, C. R. Ruffing, *January, p. 56*

101. Polymer Melt

The Melting of a Polymer on a Hot Surface, E. Stammers and W. J. Beek, *January, p. 49*

102. Polymerization

An Analog Computer Study of Polymerization Rates in Vinyl Chloride Suspensions, M. R. Meeks, *March, p. 141*
Flow Properties of Polyethylene Melts, R. A. Mendelson, *September, p. 350*

103. Polymethyl Methacrylate

The Effect of Biaxial Stress on the Creep Properties of Polymethyl Methacrylate, M. Zaslawsky, *March, p. 105*
A Model for Polymer Fatigue, D. A. Opp, D. W. Skinner and R. J. Wiktorek, *March, p. 121*

104. Polyoxymethylene

The Melting of a Polymer on a Hot Surface, E. Stammers and W. J. Beek, *January, p. 49*
The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*

105. Poly(phenylene oxide)

The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*

106. Polypropylene

The Effect of Design and Operating Conditions on Melting in Plasticating Extruders, Z. Tadmor and I. Klein, *January, p. 1*
The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*
Experimental Measurement of Temperature Profiles of Molten Flowing Polymers in a Heat Exchanger, T. H. Forsyth and N. F. Murphy, *January, p. 22*
The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*
Effect of Melt History on Polymer Crys-

tallization, J. R. Collier and L. M. Neal, *May, p. 182*
Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*
Some Physical Organic Chemistry of Aging Processes, F. R. Mayo and K. C. Irwin, *July, p. 282*
Flexural Fatigue of Glass-Reinforced Thermoplastics, L. C. Cessna, J. A. Levens and J. B. Thomson, *September, p. 339*

107. Polystyrene

Experimental Measurement of Temperature Profiles of Molten Flowing Polymers in a Heat Exchanger, T. H. Forsyth and N. F. Murphy, *January, p. 22*
The Influence of Molecular Weight Distribution on Melt Viscosity, Melt Elasticity, Processing Behavior and Properties of Polystyrene, D. P. Thomas and R. S. Hagan, *May, p. 164*
Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. I. Observation of Fine Structures Under the Electron Microscope, M. Matsuo, C. Nozaki, Y. Jyo, *May, p. 197*
Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. II. Observation of Crazing Behaviors Under the Electron Microscope, M. Matsuo, *May, p. 206*
Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*
The Effect of Penetrant Activity and Temperature on the Anomalous Diffusion of Hydrocarbons and Solvent Crazing in Polystyrene, Part I: Biaxially Oriented Polystyrene, H. B. Hopfenberg, R. H. Holley, and V. Stannett, *July, p. 242*
The Mechanical and Other Physical Properties of Polyelectrolyte Salts in the Solid State, L. E. Nielsen, *September, p. 356*
Brabender Viscometry, Part I: Conversion of Brabender Curves to Instron Flow Curves, G. C. N. Lee and J. R. Purdon, *September, p. 360*
Fatigue Behavior of Glass Fiber Fortified Thermoplastics, J. W. Dally and D. H. Carrillo, *November, p. 434*

108. Polystyrene Copolymers

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*

109. Polysulfone

The Effect of Antiplasticization on Secondary Loss Transitions and Permeability of Polymers, L. M. Robeson, *July, p. 277*

110. Polytetrafluoroethylene

The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*
Mechanical Behavior of Polytetrafluoroethylene Around the Room-Temperature First-Order Transition, G. P. Koo and R. D. Andrews, *July, p. 268*
Uniaxial Compressive Creep of Polytetrafluoroethylene, D. A. Thomas, November, *p. 415*

111. Polyurethane Elastomer

Thermomechanical Studies of Polymer Deformation, Part I: A New Deformation Calorimeter, I. J. Duvdevani, J. A. Biesenberger, and C. G. Gogos, *July, p. 250*

112. Polyvinyl Alcohol

Reciprocity Failure in Films of Flash Exposed Dichromate Sensitized Polyvinyl Alcohol, A. G. Leiga and R. A. Walder, *January, p. 35*

113. Polyvinyl Chloride

The Effect of Design and Operating Conditions on Melting in Plasticating Extruders, Z. Tadmor and I. Klein, *January, p. 1*
The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*
Particle Size and Molecular Weight Effects on the Melt Flow of Emulsion PVC, A. R. Berens and V. L. Folt, *January, p. 27*
Rheological Behavior of Poly(Vinyl Chloride)Mixtures. II. Elastic Behavior, C. L. Sieglaff and C. G. Vinson, *January, p. 73*
Rheological Behavior of Poly(Vinyl Chloride) Mixtures. I. Viscous Behavior, C. L. Sieglaff, *March, p. 81*
Some Observations on Internal Plasticization of Polyvinyl Chloride, R. Liepins, *March, p. 86*
The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*
A Model for Polymer Fatigue, D. A. Opp, D. W. Skinner and R. J. Wiktorek, *March, p. 121*
The Effect of Antiplasticization on Secondary Loss Transitions and Permeability of Polymers, L. M. Robeson, *July, p. 277*
Flow Properties of Plasticized PVC: Reduction to Composition and Interaction Variables, H. P. Schreiber, *July, p. 311*
New Processability Concepts for Rigid Vinyls. C. A. Heiberger, R. Phillips, M. J. R. Cantow, *November, p. 445*

114. Polyvinyl Chloride Copolymers

New Processability Concepts for Rigid Vinyls, C. A. Heiberger, R. Phillips, M. J. R. Cantow, *November, p. 445*

115. Polyvinyl Chloride/Rubber

Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. I. Observation of Fine Structures Under the Electron Microscope, M. Matsuo, C. Nozaki, Y. Jyo, *May, p. 197*
Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. II. Observation of Crazing Behaviors Under the Electron Microscope, M. Matsuo, *May, p. 206*

116. Pressure Effect

The Extrusion of Polymers Below Their Melting Temperatures by the Application of High Pressures, A. Buckley and H. A. Long, *March, p. 115*

117. Pressure Profile

The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*

118. Processing

The Influence of Molecular Weight Distribution on Melt Viscosity, Melt Elasticity, Processing Behavior and Properties of Polystyrene, D. P. Thomas and R. S. Hagan, *May, p. 164*
New Processability Concepts for Rigid Vinyls C. A. Heiberger, R. Phillips, M. J. R. Cantow, *November, p. 445*

R

119. Reciprocity Failure

Reciprocity Failure in Films of Flash Exposed Dichromate Sensitized Polyvinyl Alcohol, A. G. Leiga and R. A. Walder, *January, p. 35*

120. Relaxation Spectrum

Dynamic Mechanical Properties of Polymer Melts: The Dependence of Viscoelastic Properties on Molecular Weight Distribution, R. P. Chartoff and B. Maxwell, *May, p. 159*

121. Rheology

Rheological Behavior of Poly(Vinyl Chloride) Mixtures. II. Elastic Behavior, C. L. Sieglaff and C. G. Vinson, *January, p. 73*
Rheological Behavior of Poly(Vinyl Chloride) Mixtures. I. Viscous Behavior, C. L. Sieglaff, *March, p. 81*
Flow Behavior of Partially Crosslinked Low-Density Polyethylene, M. Narkis and J. Miltz, *May, p. 153*
The Influence of Molecular Weight Distribution on Melt Viscosity, Melt Elasticity, Processing Behavior and Properties of Polystyrene, D. P. Thomas and R. S. Hagan, *May, p. 164*
Rheo-optics on Two Continents—An Example of International Cooperation in Science, R. S. Stein, *September, p. 320*
Flow Properties of Polyethylene Melts, R. A. Mendelson, *September, p. 350*

122. Rheometer

Dynamic Mechanical Properties of Polymer Melts: The Dependence of Viscoelastic Properties on Molecular Weight Distribution, R. P. Chartoff and B. Maxwell, *May, p. 159*
The Influence of Molecular Weight Distribution on Melt Viscosity, Melt Elasticity, Processing Behavior and Properties of Polystyrene, D. P. Thomas and R. S. Hagan, *May, p. 164*

123. Rheo-Optics

Rheo-optics on Two Continents—An Example of International Cooperation in Science, R. S. Stein, *September, p. 320*

S

124. Screw Design

The Effect of Design and Operating Conditions on Melting in Plasticating Extruders, Z. Tadmor and I. Klein, *January, p. 1*

The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*

125. Shear

Effects of Shear Stress on Crystallization of Linear Polyethylene and Polybutene–1, T. W. Haas and B. Maxwell, *July, p. 225*

Shear Modification of Polythene, D. E. Hanson, *November, p. 405*

126. Shift Factor

Flow Properties of Plasticized PVC: Reduction to Composition and Interaction Variables, H. P. Schreiber, *July, p. 311*

Flow Properties of Polyethylene Melts, R. A. Mendelson, *September, p. 350*

127. Silane

Glass-Catalyzed Hydrolysis of Silane Coupling Agents, L. R. Daley and F. Rodriguez, *November, p. 428*

128. Sorption Kinetics

The Effect of Penetrant Activity and Temperature on the Anomalous Diffusion of Hydrocarbons and Solvent Crazing in Polystyrene, Part I: Biaxially Oriented Polystyrene, H. B. Hopfenberg, R. H. Holley, and V. Stannett, *July, p. 242*

129. Spectral Distribution Shift

Reciprocity Failure in Films of Flash Exposed Dichromate Sensitized Polyvinyl Alcohol, A. G. Leiga and R. A. Walder, *January, p. 35*

130. Stabilizer Systems

New Processability Concepts for Rigid Vinyls, C. A. Heiberger, R. Phillips, M. J. R. Cantow, *November, p. 445*

131. Stress Distribution

A Macroscopic Analysis of Composites Containing Layered Spherical Inclusions, V. A. Matonis and N. C. Small, *March, p. 90*

The Interfacial Stresses in Particulate Composite Systems, V. A. Matonis, *March, p. 100*

132. Stress-Strain

The Effect of Biaxial Stress on the Creep Properties of Polymethyl Methacrylate, M. Zaslawsky, *March, p. 105*

The Effect of Temperature on the Delayed Yield and Failure of "Plasticized" Epoxy Resin, O. Ishai, *March, p. 131*

Interpretation of the Tensile Creep Response of an ABS Polymer, R. S. Moore and C. Gieniewski, *May, p. 190*

Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. II. Observation of Crazing Behaviors Under the Electron Microscope, M. Matsuo, *May, p. 206*

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*

Mechanical Behavior of Polytetrafluoroethylene Around the Room-Temperature First-Order Transition, G. P. Koo and R. D. Andrews, *July, p. 268*

On the Characterization of Nonlinear Viscoelastic Materials, R. A. Schapery, *July, p. 295*

Derivative Stress-Strain Curves of Polyacrylonitrile Fibers, G. Egbers, *September, p. 370*

Combined Tension-Torsion Creep Experiments on Polycarbonate in the Non-Linear Range, J. S. Y. Lai and W. N. Findley, *September, p. 378*

Mechanical and Optical Properties of Block Polymers. I. Polyester Urethanes. G. M. Estes, R. W. Seymour, D. S. Huh, and S. L. Cooper, *November, p. 383*

An Izod Specimen for the Simulation of Conditions of Plastic Use, C. G. Vinson, *November, p. 388*

Uniaxial Compressive Creep of Polytetrafluoroethylene, D. A. Thomas, *November, p. 415*

133. Structure

Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. I. Observation of Fine Structures Under the Electron Microscope, M. Matsuo, C. Nozaki, Y. Jyo, *May, p. 197*

Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. II. Observation of Crazing Behaviors Under the Electron Microscope, M. Matsuo, *May, p. 206*

134. Styrene/Acrylonitrile

Flexural Fatigue of Glass-Reinforced Thermoplastics, L. C. Cessna, J. A. Levens and J. B. Thomson, *September, p. 339*

T

135. Temperature Dependence

Particle Size and Molecular Weight Effects on the Melt Flow of Emulsion PVC, A. R. Berens and V. L. Folt, *January, p. 27*

The Effect of Temperature on the Delayed Yield and Failure of "Plasticized" Epoxy Resin, O. Ishai, *March, p. 131*

The Melting of a Polymer on a Hot Surface, E. Stammers and W. J. Beek, *January, p. 49*

Interpretation of the Tensile Creep Response of an ABS Polymer, R. S. Moore and C. Gieniewski, *May, p. 190*

The Effect of Penetrant Activity and Temperature on the Anomalous Diffusion of Hydrocarbons and Solvent Crazing in Polystyrene, Part I: Biaxially Oriented Polystyrene, H. B. Hopfenberg, R. H. Holley, and V. Stannett, *July, p. 242*

Flow Properties of Plasticized PVC: Reduction to Composition and Interaction Variables, H. P. Schreiber, *July, p. 311*

Flexural Fatigue of Glass-Reinforced Thermoplastics, L. C. Cessna, J. A. Levens and J. B. Thomson, *September, p. 339*

Flow Properties of Polyethylene Melts, R. A. Mendelson, *September, p. 350*

Derivative Stress-Strain Curves of Polyacrylonitrile Fibers, G. Egbers, *September, p. 370*

136. Temperature Profile

The Simulation of the Plasticating Screw Extrusion Process with a Computer Programmed Theoretical Model, I. Klein and Z. Tadmor, *January, p. 11*

Experimental Measurement of Temperature Profiles of Molten Flowing Polymers in a Heat Exchanger, T. H. Forsyth and N. F. Murphy, *January, p. 22*

137. Tensile Modulus

Strength-Composition Relationships of Random Short Glass Fiber-Thermoplastics Composites, Lieng-Huang Lee, *May, p. 213*

138. Tensile Strength

Folded Chain Model of Highly Drawn Polyethylene, A. Peterlin, *May, p. 172*

139. Thermal Behavior

A Model for Polymer Fatigue, D. A. Opp, D. W. Skinner and R. J. Wiktorek, *March, p. 121*

Some Physical Organic Chemistry of Aging Processes, F. R. Mayo and K. C. Irwin, *July, p. 282*

Uniaxial Compressive Creep of Polytetrafluoroethylene, D. A. Thomas, *November, p. 415*

140. Thermal Stability

Resins and Reinforced Plastic Laminates for Continuous Use at 650°F—II, J. H. Freeman, L. W. Frost, G. M. Bower, E. J. Traynor, H. A. Burgman, C. R. Ruffing, *January, p. 56*

New Processability Concepts for Rigid Vinyls, C. A. Heiberger, R. Phillips, M. J. R. Cantow, *November, p. 445*

141. Thermodynamic Properties

Thermodynamic and Physical Properties of Crystals Formed from Dilute Solutions L. Mandelkern, *July, p. 255*

142. Time Dependence

The Effect of Biaxial Stress on the Creep Properties of Polymethyl Methacrylate, M. Zaslawsky, *March, p. 105*

V

143. Vinyl Chloride

An Analog Computer Study of Polymerization Rates in Vinyl Chloride Suspensions, M. R. Meeks, *March, p. 141*

144. Vinyl Esters

Some Observations on Internal Plasticization of Polyvinyl Chloride, R. Liepins, *March, p. 86*

145. Viscoelasticity

Rheological Behavior of Poly(Vinyl Chloride) Mixtures. II. Elastic Behavior,

C. L. Sieglaff and C. G. Vinson, *January, p. 73*

Rheological Behavior of Poly(Vinyl Chloride) Mixtures. I. Viscous Behavior, C. L. Sieglaff, *March, p. 81*

Dynamic Mechanical Properties of Polymer Melts: The Dependence of Viscoelastic Properties on Molecular Weight Distribution, R. P. Chartoff and B. Maxwell, *May, p. 159*

Fine Structures and Fracture Processes in Plastic/Rubber Two-Phase Polymer Systems. I. Observation of Fine Structures Under the Electron Microscope, M. Matsuo, C. Nozaki, Y. Jyo, *May, p. 197*

On the Characterization of Nonlinear Viscoelastic Materials, R. S. Schapery, *July, p. 295*

Combined Tension-Torsion Creep Experiments on Polycarbonate in the Non-Linear Range, J. S. Y. Lai and W. N. Findley, *September, p. 378*

Shear Modification of Polythene, D. E. Hanson, *November, p. 405*

Uniaxial Compressive Creep of Polytetrafluoroethylene, D. A. Thomas, *November, p. 415*

146. Viscometry, Brabender

Brabender Viscometry, Part I: Conversion of Brabender Curves to Instron Flow Curves, G. C. N. Lee and J. R. Purdon, *September, p. 360*

147. Viscosity

Rheological Behavior of Poly(Vinyl Chloride) Mixtures. I. Viscous Behavior, C. L. Sieglaff, *March, p. 81*

Flow Behavior of Partially Crosslinked Low-Density Polyethylene, M. Narkis and J. Miltz, *May, p. 153*

The Influence of Molecular Weight Distribution on Melt Viscosity, Melt Elasticity, Processing Behavior and Properties of Polystyrene, D. P. Thomas and R. S. Hagan, *May, p. 164*

W

148. Water Absorption

Resins and Reinforced Plastic Laminates for Continuous Use at 650°F–II, J. H. Freeman, L. W. Frost, G. M. Bower, E. J. Traynor, H. A. Burgman, C. R. Ruffing, *January, p. 56*

149. Weathering

Natural and Artificial Weathering of Polyethylene Plastics, J. B. Howard and H. M. Gilroy, *July, p. 286*

Y

150. Yield Characteristics

Effect of Temperature on the Delayed Yield and Failure of "Plasticized" Epoxy Resin, O. Ishai, *March, p. 131*
